Sprint 4 Plan
Project: Beads Net
Team: Weaver
Sprint Completion date: 12/02/2018

Goal:

      To make an app that can allow users to find a list of similar movies/animes with ranking in spider-web like form by searching names or clicking on tags. It also let users to get the information of the movies and add tags for specific movies.

Tasklisting :

    User story 1: As a user, I want to save the movie or anime I like to my profile so that I can have a quick access to my preferred ones.

    Task 1 - Link the profile to database (5hr)

    Task 2 - Save the result into database after user click on "like" button (8hr)

    Task 3 - Read and display the saved result from database onto profile page (8hr)

    Total time for user story 1: 21 hr

    User story 2: As a user, I want to see a list of results that can be filtered by certain factors after search because I want to have a traditional way of searching for film.

    Task 1 - Implement filter feature (13hr)

    Task 2 - Users can go to next page of the result (8hr)

    Task 3 - Tags are able to search for genre instead of title (5hr)

    Task 4 - Anime page can only searched for animation movies (5hr)

    Total time for user story 2: 31 hr

    User story 3: As a user, I want to see different appearance of results, because I want to understand which movie has more rating.

Task 1 - Change the size of the results based on distance. (8hr)

Task 2 - Showing description when mouse over the posters. (5hr)

Task 3 - Be able to present 10+ results (3hr)

Total time for user story 3: 16hr

User story 4: As a user, I want the webpage looks neat because I don't want to use an ugly website.

Task 1 - Improve the sign up/login page design (3hr)

Task 2 - Improve the home page design (3hr)

Task 3 - Improve the result page design (3hr)

Task 4 - Improve the profile page design (3hr)

Total time for user story 4: 12 hr

Team Roles:

Zike Peng, Project Owner (Database)

Jiapei Kuang, Developer(Debugger, UI Developer)

Ge Lu, Developer (Scrum Master, UI Developer)

Zidu Chen, Developer(front-end)

Zhiyue Li**,** Scrum Master(front-end)

Initial Task Assignment:

Zike Peng: User story 1, Task 1, 2, 3

Jiapei Kuang: User story 2, Initial Task 1 (List view)

Ge Lu: User story 3, User story 2 task 1,2

Zidu Chen: User story 3 task 1,3

Zhiyue Li: User story 2, Task 1

Initial Burnup Chart:

Initial Scrum Board:

User Stories	To Do	In Progress	Done
User story 1: As a user, I want to save the movie or anime I like to my profile so that I can have a quick access to my preferred ones.			
User story 2: As a user, I want to see a list of results that can be filtered by certain factors after search because I want to have a traditional way of searching for film.			
User story 3: As a user, I want to see different appearance of results, because I want to understand which movie has more rating.			
User story 4: (UI improvement)As a user, I want the webpage looks neat because I don't want to use an ugly website.
